Exclusive and customized for Premier members, the Essential Services reduce risk and address cyber challenges facing healthcare organizations.

Cyber Security Solutions

Incident Response Planning

IR Plan Development
Creates a structured and actionable framework to effectively respond to cybersecurity incidents.

IR Playbook Development
Playbooks serve as quick reference guides for incident responders to facilitate the effective and efficient response to incidents such as Ransomware, Phishing, or Credential Loss, etc.

Tabletop Exercises
Structured and interactive simulations of various cybersecurity scenarios in a controlled environment to help evaluate incident response, crisis management, and decision-making processes.

Strategy, Risk & Compliance

Security Awareness Training
Remote or in-person training session focused on industry best security practices, suitable for general audiences. Specialized training available on request.

Policy/Procedures Development
Written policy development based on industry-specific security controls or custom organizational requirements. Priced per policy or procedure.

HIPPA Gap Assessment & Roadmap
This assessment helps organizations identify gaps where their current practices may not align with HIPAA/HITECH requirements and plans necessary changes to ensure compliance.

Threat & Vulnerability

Vulnerability Assessment
Assesses internal and external-facing systems, networks, and applications to identify potential vulnerabilities and security weaknesses to evaluate the organization's security posture from the perspective of an attacker.

Penetration Testing
Evaluates internal and external facing systems, networks, and applications to identify vulnerabilities and security weaknesses to simulate activities of external attackers seeking unauthorized access to an organization's assets.

Web Application Pen Testing
Assesses web applications, websites, and APIs, including simulating cyberattacks to identify vulnerabilities, weaknesses, and potential threats to uncover security flaws that could be exploited by malicious actors.

Microsoft & Cloud

Defender for Office 365 Deployment
Fortify your Office 365 setup with proactive protection against advanced threats, ensuring the safety of your data and communications. The service integrates seamlessly with existing Office 365 applications, enhancing their security without compromising user experience.

Active Directory/Entra ID Security Assessment
Provides a comprehensive evaluation of an organization's identity and access management systems. It includes a thorough review of Active Directory and Entra ID environments, risk assessment, and compliance check to enhance security, improve compliance, and optimize performance.

Entra ID Plan 1 Deployment
Evaluates current configurations and features in use and optimizes configurations based on best practices. Any unused features with a business use case will be enabled. Common Plan 1 features include MFA, Conditional Access, and SSO with SaaS applications.

Enhanced Cyber

Exclusive and customized for Premier members, *Enhanced* services go beyond Essential controls providing greater protections for healthcare organizations. Fixed fee services based on member size. XDR based on # of endpoints (servers, laptops, desktops, workstations) starting at 250 endpoints.

Incident Response Program	Strategy, Risk & Compliance	Threat & Vulnerability	Managed eXtended Detection & Response (MXDR)	Microsoft & Cloud Security
▪ Endpoint Compromise Assessment	▪ Virtual CISO (vCISO) ▪ Virtual CTO (vCTO)	▪ Penetration Testing as a Service ▪ Vulnerability Management as a Service	▪ 24/7 Monitoring across threat landscape ▪ Threat Hunting & Containment	▪ Microsoft Purview for Healthcare Deployment (Data Classification) ▪ Intune for Healthcare Deployment (Device Management) ▪ Extra ID P2 Deployment Service
